Project no. 018340

Project acronym: EDIT

Project title: Toward the European Distributed Institute of Taxonomy

Instrument: Network of Excellence

Thematic Priority: Sub-Priority 1.1.6.3: "Global Change and Ecosystems"

C5.145 Import of test sets of selected libraries

consisting of a) bibliographic data from the library catalogues and b) licence information on subscribed digital literature. Launch of a prototype of the references index.

Due date of component: Month 48
Actual submission date: Month 48

Start date of project: 01/03/2006   Duration: 5 years

Organisation name of lead contractor for this component: 30 MFN

Revision: final

Project co-funded by the European Commission within the Sixth Framework Programme (2002-2006)		
Dissemination Level		
PU	Public	X
PP	Restricted to other programme participants (including the Commission Services)	
RE	Restricted to a group specified by the consortium (including the Commission Services)	
CO	Confidential, only for members of the consortium (including the Commission Services)	

C5.145 Import of test sets of selected libraries consisting of a) bibliographic data from the library catalogues and b) licence information on subscribed digital literature. Launch of a prototype of the references index.

The prototype of the references index (GBV demonstrator for the EDIT/BHL-Europe GRIB) was built by the German common library network GBV (Gemeinsamer Bibliotheksverbund, Göttingen). It allows users to browse and search titles held by libraries of EDIT member institutions and will include library catalogue data from BHL-Europe/BHL institutions in the future. The Homepage of the references index is shown in Fig. 1.[1]

Test sets from FUB-BGBM, MFN, NNM Naturalis and NHML have been imported into and are in the process of being deduplicated within the GBV demonstrator. The first page of results for a search for all datasets is shown in Fig. 2.[2] At the moment, there are 156.370 datasets in the index and 5.804 titles have been merged, with 2.742 possible merging candidates being identified. The algorithm for deduplication is in the process of being adjusted. Fig. 3[3] shows an example of a merged record, with holdings information from **NNM Naturalis** and from FUB-BGBM. An example of licence information on subscribed digital literature as part of the metadata is provided in Fig. 4.[4]

about the database | welcome   Copyright © 2010 OCLC

Welcome to the GBV demonstrator for the EDIT/BHL-Europe GRIB

This demonstrator, a joint effort of EDIT/ViTaL and BHL-Europe, built by the Common Library Network GBV (Gemeinsamer Bibliotheksverbund) allows users to browse and search titles held by EDIT, BHL-Europe and BHL member institutions (Test sets from FUB-BGBM, MfN, NAT and NHM at the moment) using advanced filtering. It will be further developed and extended towards the Global References Index to Biodiversity (GRIB). It will then be a tool to manage the taxonomic literature that is (a) already available in digital form, (b) in the process of being digitised, and (c) for which plans have been created for digitisation.
